SECRET,		25X1
	<u></u> 2 -	

- j. Electrotechnical drawing;
- k. Home electrical installations;
- High tension currents;
- m. Low tension currents;
- n. Electric power stations and high tension lines;
- o. Experimental electricity laboratory;
- p. Thermal and hydraulic machinery;
- q. Mathematics;
- r. Languages, two hours per week of Bulgarian and of Russian, and one hour per week of a third language (either German, French, or English); and
- s. Other subjects concerning which informant could give no details.
- 3. For seventh grade teachers (sic), five years of study are required. For lyceum teachers (sic), an additional two years of "qualification" study are required. Seven hundred students were enrolled in five regular courses and two "qualification" courses. Students may become specialists in either high tension current or low tension current. At the end of the prescribed courses of study, students are given diplomas as electrotechnical technicians with either the high or low tension specialty.
